

Meridian Robotics Inc. — Q3 2025 Earnings Call Transcript

CEO Remarks

Thank you all for joining. This was a strong quarter for Meridian. Revenue grew fourteen percent year over year to \$412.6 million, ahead of the high end of our guidance range. We signed three new enterprise logistics customers in the quarter, including our first deployment in the automotive parts distribution vertical.

Looking ahead, we are raising our full-year revenue guidance to a range of \$1.62 billion to \$1.65 billion, up from our prior range of \$1.55 billion to \$1.60 billion.

CFO Remarks

Gross margin came in at 41.2 percent this quarter, a 250 basis point improvement year over year, driven primarily by component cost reductions and yield improvements at our Ohio manufacturing facility. We expect gross margin to remain in the 40 to 42 percent range for the remainder of the fiscal year.

We ended the quarter with \$215.4 million in cash and no debt outstanding, giving us significant flexibility to continue investing in research and development while also returning capital to shareholders through our buyback program.

Q&A; Session

Analyst question: Can you comment on competitive pressure from newer entrants in the warehouse automation space?

CEO response: We're aware of several well-funded startups in this space. Our approach has been to compete on reliability and total cost of ownership rather than upfront price alone, and our renewal rates with existing customers remain above ninety percent.
